WHOLESALE PRICE LIST OF EVERGREENS FALL 1926 AND SPRING 1927 DELIVERY

The prices contained herein are intended for dealers only. In addition to the stock listed we have some very fine Colorados, both Shiners and Greens in sizes ranging from three to fifteen feet which have been slightly damaged by close growing but which are very suitable for back plantings and groupe plantings. Trees damaged on one side only are acceptable to the customers for groupe plantings for the reason that they can be secured at greatly reduced prices. The stock damaged on two or more sides are used to considerable extent for back plantings where only the top half of the trees can be seen. The color of this stock is as good as the specimen trees.

Special prices on this slightly damaged stock will be given on application. When applying for these prices please state the purpose for which this stock is to be used and whether stock is required damaged on one, two or three sides.

We also have a considerable stock of Black Hills, Douglas Fur, Balsam Fur and Norway Spruce of the same type as noted above.

Also we have a large stock of heavy Colorado Blue Shiners of exceptional fine color and form ranging from 15 to 25 feet in height. We have photographs of a large number of these special trees which we will be glad to send to nurserymen or landscapemen on application with prices quoted thereon.

If interested in any of this large stock please state the size required when requesting photographs and prices.

RESPONSIBILITY

Our responsibility ceases upon delivery in good condition to the Transportation Company.

TERMS

To reliable parties, December 1st and June 1st payments.
